

Power Outage Now what do we do

You may not realize how much we depend on power in our daily lives. Heating, cooling, refrigeration, and lighting are necessities homes and businesses depend on. Unexpected power outages have become more frequent, with causes ranging from severe weather to an overtaxed power grid. With extensive lines of automatic standby generators, Hartland Electric along with Generac products have comprehensive power solutions to cover any situation.

14 KW Generac Stand Alone Generator with a 100 AMP Transfer Switch

"Energy will be the immediate test of our ability to unite this nation, and it can also be the standard around which we rally. On the battlefield of energy we can win for our nation a new confidence, and we can seize control again of our common destiny. Our excessive dependence on OPEC has already taken a tremendous toll on our economy and our people. It's a cause of the increased inflation and unemployment that we now face. This intolerable dependence on foreign oil threatens our economic independence and the very security of our nation."

The energy crisis is real. It is world-wide. It is a clear and present danger to our nation. These are facts and we simply must face them." Jimmy Carter 1976

LET US BE YOUR BUSINESS PARTNER AND
TOGETHER WE CAN MAXIMIZE ON THE
RUSH INTO THE RENEWABLE ENERGY
